SAFETY INSTRUCTIONS AND GENERAL GUIDELINES FOR THE USE OF MACHINE-MADE AND HANDCRAFTED DRINKING GLASSES (STEMWARE AND TUMBLERS)

These instructions are intended for adults who use drinking glasses for domestic purposes.

SAFETY INSTRUCTIONS:

Rinse the items before (first) use.

PRODUCT SAFETY NOTES

GENERAL GUIDELINES:

- The drinking glasses are suitable for drinking hot and cold beverages (alcoholic and non-alcoholic, non-acidic).
- The recommended minimum and maximum temperature is between 8° and 25°C. Glasses are very sensitive to temperature and sudden temperature changes can shorten the lifespan of glasses. Always allow glasses to cool to room temperature before filling with cold drinks.
- The drinking glasses are not suitable for hot drinks and not for use in the oven, on the stove or in the microwave.
- Glass is fragile. Handle the drinking glasses with care to avoid breakage, cracks or chips.
- Glass is subject to a regular ageing process. Excessive mechanical or thermal stress or temperature differences can cause tension and breakage. To prevent this or scratches, avoid direct contact with ceramic objects, metal or other glass objects.
- The glasses are not suitable for small children (up to and including 3 years of age). Keep out of reach of children. We recommend that children only use the glasses under supervision.
- Due to the risk of injury and choking, the glasses are exclusively suitable for drinking and not for playing, biting or inserting into orifices, etc.
- Glass items advertised as decorative objects (vases, tea lights, etc.) are intended solely for decoration and are not suitable for use with food or as containers for drinks.
- If the glass is damaged (cracks, chips, splinters), it must no longer be used.
- Do not use glasses in conjunction with metal cutlery (for example, to scoop up food that has been filled into them).

PRODUCT IMAGE – DESCRIPTION

DENK`ART
BURGUNDER

GLASS HEIGHT: 230 MM

CAPACITY: 960 ML

HS CODE: 70132810

Item No. 11101
